

$$\int (x \pm a^2) \quad e = 2,79$$

Jewels Academy

VIRTUAL MATH TUTORING

When: Mondays, 3/25-4/29

Time: 5:30 p.m. - 6:30 p.m. CST, Mondays
Virtual.

Where: Virtual - Email invites will be sent to the virtual classrooms.

Cost: The cost is waived during the winter session due to our generous donors and sponsors. Seats are limited. Register above.

Who: Grades 4th - 8th (Note: resources available for advanced concepts - Algebra I, II, Geometry, and Precalculus)

Follow the link underneath to learn more or email Info@jewelsacademy.org for questions

$$S = \int_{t=2}^{10} f$$

$$x + a^2 = \frac{b \pm \sqrt{b^2 - 4ac}}{2a}$$

$$S_3 = \begin{bmatrix} 1 & 0 & 0 \\ 1 & 0 & 1 \\ 0 & 0 & 1 \end{bmatrix}$$

$$\sin a = b$$

Handwritten math notes on the left side of the flyer, including: $e = \infty$, \ln , $\frac{3a}{x}$, and $y = 2x^2$.
